There are plenty of benefits to using an EMR in your practice besides the $44,000 HIT Federal Incentives. STI will show you why the ChartMaker® EMR is your best choice.

Plus if you upgrade now you may receive FREE Voice Recognition software when you purchase a new ChartMaker® EMR from STI.

Electronic Medical Records (EMR) Physician Recovery Act Incentive

On February 17, 2009, President Obama signed the American Recovery and Reinvestment Act of 2009, a critical measure to stimulate the economy. Among other provisions, the new law provides major opportunities for the Department of Health and Human Services (DHHS), its partner agencies, and the states to improve the nation’s health care through Health Information Technology (HIT) by promoting the meaningful use of electronic health records (EMR) via incentives. Qualifying physicians can receive up to $44,000 over a five-year period to defray the cost of using an EMR software system in their office-based medical practice.

"Another reason for physicians to sign up for an EMR now, is that if they wait too long, they won’t be able to get any EMR vendor to commit to implementing them by 2011 because every EMR vendor will be backed up with implementations."

Make 2010 your year to add Electronic Medical Records (EMR). The ChartMaker Medical Suite consists of four unified modules with a phased implementation approach and an affordable cost.

The ChartMaker Medical Suite
1. ChartMaker Practice Manager®
2. ChartMaker Scheduler®
3. ChartMaker Entry Point®
4. ChartMaker Clinical®

ChartMaker Scheduler makes scheduling easy with color-coded graphics and automatic reminders. Eligibility Checking is included!

ChartMaker Practice Manager handles all of your billing needs from start to finish with all the stability and functionality of a real Microsoft Windows system. Best of all, STI provides Electronic Claim submission to most carriers.

ChartMaker Entry Point uses modern scanning functionality to provide an orderly transition of existing paper medical charts into an electronic format. A detailed patient face sheet with automatic reminders, electronic prescription writing, and electronic lab results are included.

ChartMaker Clinical is a pen-based, template-driven system of Electronic Medical Records which can be customized to your medical specialty. It is designed to produce legible, detailed patient charts which can be securely accessed from a home office or other remote location. With voice-recognition features, referral correspondence can be created directly from progress notes. A Coding Assistant is included to help determine the correct E&M code from the completed office note.

Proven Experience — While many other vendors are less than five years old, STI sold its first Practice Management System in 1979. With new vendors the EMR may be sufficient, but how robust is their practice management option? A good EMR with a weak practice management component won’t do your practice any good, and may cost you a lot of money in rejected insurance claims. STI currently has over 3,000 medical practice customers using their software — representing over 7,500 physicians. STI prides itself on its reputation for great system support.

Trust — Purchase your software from a trusted company with an established track record in providing excellent software support to the medical community.

STI’s 3-Step Formula to Maximize the Federal Healthcare Incentives

1. First, take advantage of Section 179 of the Federal Income Tax code before it changes. If you install a new STI ChartMaker® System you may qualify for a tax reduction on your federal income taxes. For example, if you are in the 33% income tax bracket a $15,000 purchase qualifies you for a $4,950 tax deduction. Plus if you lease-purchase your system you don’t even need to outlay the $15,000 to qualify for the tax deduction. One lease payment for as little as $99 can qualify you for the $4,950 tax deduction. Check with your accountant, to be sure that you qualify.

2. Second, take advantage of the 2010 Medicare 2% ePrescribing incentive. For example, a practice that qualifies and has $250,000 of Medicare reimbursement can receive an additional $5,000 payment from Medicare, if you ePrescribe in 2010. If you act quickly, you’ll be trained and ready to ePrescribe in 2010, with the STI electronic prescribing system.

3. Third, take advantage of the American Recovery and Reinvestment Act recently signed by President Obama, which includes legislation to promote the use of healthcare information technology for all healthcare providers. Each office-based physician who reports meaningful use of a certified EMR could receive up to $44,000 (Medicare) or $64,000 (Medicaid) in government funding. Payments begin in 2011. To maximize your bonus you need to be an "early adopter". For example, if you miss the first two years of the incentive eligibility period you won’t qualify for up to 68% of the payments. To get the most incentive you need to be using your EMR by December 31st, 2010. Once you start using your STI electronic prescribing system, we will begin planning for installation and training of your ChartMaker EMR so you are up-and-running on your EMR before December 31st, 2010.

For most physicians, these three financial incentives will more than pay for a new STI ChartMaker® System. Some physicians may even make money on the incentives. But, don’t wait until the last minute or you could miss this opportunity. There aren’t enough EMR vendors to install 500,000 physicians by year-end if you wait until the last minute to decide. You need to be using the EMR to qualify for the 2011 incentive, not just purchase it. Plus practices that don’t ePrescribe or install an EMR will eventually experience a Medicare financial penalty.

Call STI today at 800-487-9135, extension 1188 for details and a personal consultation.

ChartMaker Electronic Prescribing

Take advantage of the Medicare ePrescribing incentive. There has never been a better time for medical offices to add ePrescriptions, thanks to financial incentives from Medicare.

Medical practices using e-prescribing technology will be eligible to receive a 2% increase in reimbursements from Medicare in 2010. Depending on the volume of claims submitted by your office, this can add up to quite a sum over time! Starting in 2012, practices not using e-prescribing will actually incur penalties and decreased revenue.

When you purchase the ChartMaker EMR

Remember, these incentives are offered to those medical practices which begin using ePrescribing systems early. If you wait too long, these incentives will no longer be available. Be one of the offices to lead the transition to ePrescribing while taking advantage of these great incentives. Call 800-487-9135 x 1188 to learn more.
